Dialog Medical Appoints New CFO

Jody Kelly brings nearly 20 years of financial management experience to growing healthcare technology vendor

ATLANTA, August 29, 2006 — Dialog Medical, the leading provider of informed consent and patient education systems for hospitals and physician practices, today announced the appointment of Jody Kelly, CPA as chief financial officer. In this role, Kelly is responsible for overseeing and directing all of Dialog Medical's financial and accounting functions.

Kelly most recently served as controller for JGA Corporation, a premier supplier of exterior building products, where she managed the financial success of the company as it grew from \$50 million in revenue to \$110 million in revenue. Prior to that, she held the positions of auditor with the public accounting firm, Atkinson & Pitts, and financial analyst with the medical device manufacturer, C.R. Bard, Inc.

"We continue to see a great demand for our solutions as forward-thinking healthcare organizations realize the financial and organizational benefits of an automated, standardized informed consent process," said Michael Burke, president of Dialog Medical. "Jody's wealth of strategic financial management experience will prove invaluable during this important period of corporate growth."

Dialog Medical's iMedConsent™ application includes JCAHO and CMS-compliant, procedure-specific consent forms for more than two thousand medical and surgical procedures; patient education documents for thousands of diagnoses and treatments; and an extensive anatomical image gallery that allows the physician to annotate images and simplify complex topics for the patient. In addition, the application automates the completion of patient documentation ranging from HIPAA disclosures to advance directives, including the digital capture of signatures, paperless storage of signed documents and the posting of key notes to the patient's electronic medical record.

"Having the opportunity to work for a cutting-edge company with an established reputation for enhancing patient safety is very exciting," said Kelly. "I look forward to playing an integral role in their continued success."

About Dialog Medical

Dialog Medical is a leading provider of informed consent and patient education systems for hospitals and physician practices. The company's iMedConsent™ application is currently used by more than 15,000 physicians in hospitals and physician practices nationwide.
